

Instalación de entorno: Visual Studio Code, Git y Python, y creación de cuentas de Gmail y GitHub (versión 2026.07.13)

1. Instalar visual studio code

<https://code.visualstudio.com/download>

Ir a la carpeta de descargas y dar click en correr como administrador

Aceptar la licencia

Click en Next o Continuar

Dar clic en Next o Continuar

Se abre VSC

2. Instalar GIT

<https://git-scm.com/downloads>

← → ↻ git-scm.com/downloads

git --distributed-even-if-your-workflow-isnt

The entire **Pro Git book** written by Scott Chacon and Ben Straub is available to read online for free. Dead tree versions are available on [Amazon.com](#).

Downloads

🍏 macOS 🪟 Windows
🐧 Linux/Unix

Older releases are available and the Git source repository is on GitHub.

GUI Clients
Git comes with built-in GUI tools (**git-gui**, **gitk**), but there are several third-party tools for users looking for a platform-specific experience.
[View GUI Clients →](#)

Logos
Various Git logos in PNG (bitmap) and EPS (vector) formats are available for use in online and print projects.
[View Logos →](#)

Git via Git
If you already have Git installed, you can get the latest development version via Git itself:

```
git clone https://github.com/git/git
```

You can also always browse the current contents of the git repository using the [web interface](#).

Latest source Release
2.47.0
Release Notes (2024-10-06)
[Download for Windows](#)

Dar click en sistema operativo por ejemplo Windows

git --local-branching-on-the-cheap

Next

Enable file system caching

Install

Finish

Instalación de GIT, se puede cerrar esta ventana

3. Instalar Python

<https://www.python.org/downloads/>

Ingresa a la página y da clic en el botón amarillo Download Python (descarga la versión para tu sistema operativo, por ejemplo Windows).

Ir a la carpeta de descargas y ejecutar el instalador como administrador.

IMPORTANTE: antes de continuar, marcar la casilla Add python.exe to PATH en la parte inferior del instalador.

Dar clic en Install Now.

Esperar a que termine la instalación y dar clic en Close.

Para verificar la instalación, abrir una terminal (cmd o la terminal de VSC) y ejecutar el comando:

```
python --version
```

Si aparece la versión instalada (por ejemplo Python 3.12.4), la instalación fue exitosa.

4. Crear cuenta de Gmail (si aún no tienes un correo)

<https://accounts.google.com/signup>

Ingresa a la página de registro de Google y da clic en Crear cuenta → Para mi uso personal.

Escribe tu nombre y apellidos y da clic en Siguiente.

Ingresa tu fecha de nacimiento y tu género, luego da clic en Siguiente.

Elige una de las direcciones de Gmail sugeridas o crea la tuya propia (este será tu correo) y da clic en Siguiente.

Crea una contraseña segura que recuerdes, confírmala y da clic en Siguiente.

Si Google lo solicita, ingresa un número de teléfono para verificar la cuenta y escribe el código que llega por SMS.

Agrega un correo de recuperación si lo deseas (opcional) y da clic en Siguiente.

Revisa la información de tu cuenta y da clic en Siguiente.

Acepta las condiciones de Privacidad y Términos dando clic en Acepto.

¡Listo! Tu cuenta de Gmail está creada. Este es el correo que usarás en el siguiente paso para crear tu cuenta de GitHub.

5. Crear cuenta de GitHub, ingresa a la siguiente página web

<https://github.com/signup>

Ingresa el correo con el cual quieres usar GitHub y dar click en Continue

Ingresa un password que no hayas usado en otra web y que lo recuerdes para usarlo para ingresar a tu cuenta de GitHub
